

Abdelrahman Mohamed

Front-End Developer

abdelrahman.mohamed8568@gmail.com | LinkedIn | GitHub | Portfolio | +201110828568 | Cairo, Egypt

Summary

Frontend Developer with 3+ years of experience building scalable web applications and high-converting e-commerce platforms using React, Next.js, TypeScript, and Tailwind CSS. Skilled in frontend architecture, reusable component systems, state management, SSR, and API integration. Specialized in optimizing Core Web Vitals, SEO, performance, and RTL/Arabic localization to deliver production-ready user experiences from design to deployment.

Professional Experience

Front End Developer

10/2025 – Present

TOT Platform

- Collaborated with design and back-end teams to transform UI/UX blueprints into clean, scalable code.
- Developed reusable and responsive front-end components using Next.js, improving scalability and reducing feature delivery time by approximately 30%.

Front End Developer

02/2023 – 10/2025

Self-Employed (Freelance)

- Architected and delivered custom Next.js/React solutions for B2B & B2C clients, achieving an average Lighthouse performance score of 90+.
- Integrated complex state management and RESTful APIs across multiple client production apps.

Loan Officer

07/2022 – 12/2022

Attijariwafa Bank

- Collaborated with cross-functional teams to optimize sales processes.

Projects

Aura Beauty

E-Commerce Website

A full-featured e-commerce platform built with Next.js for a fast and SEO-friendly experience. I implemented Redux Toolkit for efficient state management and integrated Supabase to handle all product and order data. The front end was styled with Chakra UI, featuring smooth GSAP and Framer Motion animations to enhance the user experience.

Goods EG

E-Commerce Website

A comprehensive e-commerce marketplace built using Next.js, Implemented SSR and SEO optimization to improve discoverability and performance. It features a complete workflow for product sales, business-to-business communication, delivery services, and a real-time live chat system.

ABH [↗](#)

E-Commerce Website

A complete car service booking project in Saudi Arabia, built using Next.js, achieving a 90+ Lighthouse performance score and significantly reducing page load times. I worked closely with the backend development team to seamlessly integrate Odoo ERP APIs for branch management and real-time payment records.

Pixel [↗](#)

E-Commerce Website

A professional e-commerce store for smart devices, built using Next.js, ensuring fast performance and search engine optimization. The focus was on making it easy for users to find the products they are looking for.
