

Abdelrahman Mohamed

Front-End Developer

abdelrahman.mohamed8568@gmail.com | LinkedIn | GitHub | Portfolio | +201110828568 | Cairo, Egypt

Summary

Frontend Developer with 3+ years shipping production-grade web applications. Currently the sole frontend developer at TOT Platform, owning architecture and delivery across live products operating with full autonomy to drive all frontend initiatives. Specialized in Next.js, TypeScript, ERP system integration, and Core Web Vitals optimization.

Professional Experience

Front End Developer

10/2025 – Present

TOT Platform

- Architect scalable frontend solutions using Next.js, React, and TypeScript, with a strong emphasis on reusable components, design systems, maintainability, and long-term scalability.
- Partner with cross-functional teams including product, design, backend, and QA to deliver high-quality features aligned with business objectives.
- Build complex business interfaces with responsive design, authentication, API integrations, RTL/Arabic localization, SEO optimization, and high-performance rendering strategies.
- Leverage AI-assisted development tools to accelerate implementation, improve code quality, streamline debugging, and enhance development productivity.

Front End Developer

02/2023 – 10/2025

Self-Employed (Freelance)

- Delivered custom Next.js/React applications for multiple B2B and B2C clients, averaging a 90+ Lighthouse performance score across production deployments
- Integrated state management (Redux Toolkit, Zustand) and RESTful/third-party APIs across independent e-commerce and service-booking projects
- Owned the full project lifecycle from client requirements through deployment, managing scope, timelines, and technical decisions independently

Loan Officer

07/2022 – 12/2022

Attijariwafa Bank

- Collaborated with cross-functional teams to optimize sales processes.

Projects

Aura Beauty

E-Commerce Website

A full-featured e-commerce platform built with Next.js for a fast, SEO-friendly experience. Redux Toolkit handled state management and Supabase managed all product and order data. Styled with Chakra UI, featuring GSAP and Framer Motion animations.

Goods EG [↗](#)

E-Commerce Marketplace

A comprehensive e-commerce marketplace built with Next.js, implementing SSR and SEO optimization to improve discoverability and performance. Designed to support 10,000+ users with complete product sales workflows, B2B communication, delivery services, and real-time live chat.

ABH [↗](#)

Car Service Booking Platform

A complete car service booking platform for the Saudi Arabian market, built with Next.js, achieving a 90+ Lighthouse performance score and significantly reduced page load times. Integrated Odoo ERP APIs for branch management and real-time payment records.

Pixel [↗](#)

E-Commerce Website

A professional e-commerce store for smart devices, built using Next.js, ensuring fast performance and search engine optimization. The focus was on making it easy for users to find the products they are looking for.
